Mathematical Statistics, Final Exam, due May 9 1 True or false? Give arguments (a) If two different estimators are unbiased, they are equally as good and it does not matter which one we use (b) An increased confidence level typically leads to a longer confidence interval (c) An increased sample size typically leads to a longer

Mathematical Statistics

Statistics is about the mathematical modeling of observable phenomena, using stochastic models, and about analyzing data: estimating parameters of the model and testing hypotheses In these notes, we study various estimation and testing procedures We consider their theoretical properties and we investigate various notions of optimality
